### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al (U.S. Patent No. 4,648,935) in view of Romes (U.S. Patent No. 6,595,455).

With respect to Claims 1 and 3-4, Brown et al, Figures 1-7, teach an apparatus 2 comprising a frame 6; a first roller 26, a second roller 62; a roll R1.

Brown et al teach all the elements of the apparatus except for a tensioning plate against the roll. However, Romes, Figures 5 and 6, teaches a tensioning plate 217; the tensioning plate comprises a plate pivotally mounted to a rear portion of said frame and spring 243 biased against said roll. It would have been obvious to one of ordinary skill in the art to provide Brown et al with a tensioning plate, as taught by Romes, for the purpose of providing an anti-reverse brake structure which prevents the roll from being drawn backwards in a direction opposite that of the intended direction of dispensing.

### ***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5 and 6 are allowed.

***Response to Arguments***

Applicant's arguments filed June 27, 2005 have been fully considered but they are not persuasive.

With respect to applicant's remarks regarding the combination of Brown in view of Romes, it should be noted that a reference is to be considered not only for what it expressly states, but for what it would reasonably have suggested to one of ordinary skill in the art. Further, the examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would have been motivated to make the proposed combination of primary and secondary references. However, there is no requirement that a motivation to make the modification be expressly articulated in the primary reference. References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3654

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
